How to setup Zoom and YouTube Live

Setting up a custom stream from **Zoom to YouTube** involves configuration on both platforms. This method is often used when you want to schedule a stream in advance on YouTube, as opposed to using the native 'Live on YouTube' integration which starts an instant stream.

1. Prerequisites

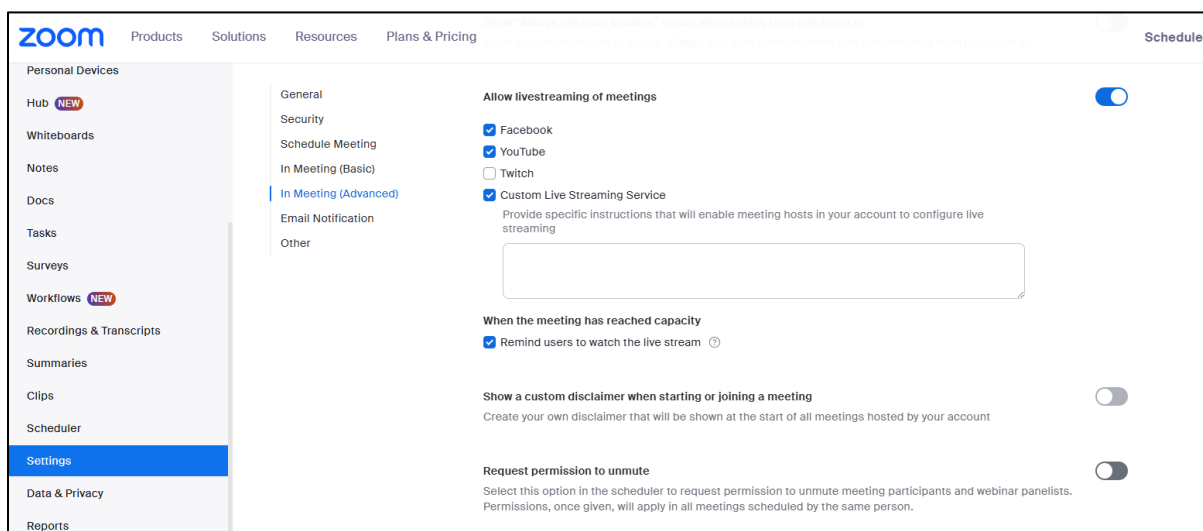

- **Zoom Account:** Pro, Business, Education, or Enterprise account (Free accounts don't support custom live streaming).
- **Zoom Desktop Client:** Latest version.
- **YouTube Channel:** Your channel must be verified for live streaming, which can take up to **24 hours** after initial verification. Please use channel: Indonesian Muslim Association in Singapore (email: imassdotsg@gmail.com).

2. Enable Custom Live Streaming in Zoom

Note: If you are using **IMAS account** (zoomtahlil@googlegroups.com), skip this step.

Please follow below steps to configure your account. You must be an account Admin or have permission to edit user settings. This is a one-time setup.

1. Sign in to the **Zoom web portal** (<https://www.zoom.com/>).
2. Go to **Personal** → **Settings**.
3. Click the **Meeting** tab, then find the **In Meeting (Advanced)** section.
4. Toggle on **Allow live streaming meetings**.
5. Check the box next to **Custom Live Streaming Service** (no need to provide specific instructions, leave it blank or default value).

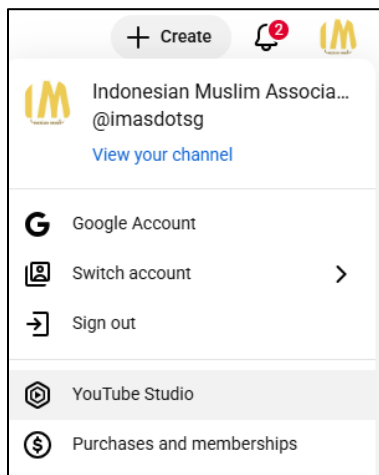

6. Click **Save**.
7. Go to **Admin** → **Account Management** → **Account Settings** and redo step 3 – 6.

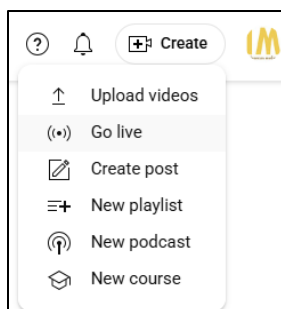

3. Schedule Your Live Stream on YouTube

This is where you'll get the critical streaming credentials.

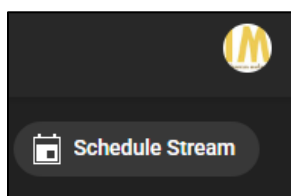

1. Login to IMAS account (imasdotsg@gmail.com) then go to **YouTube Studio**.

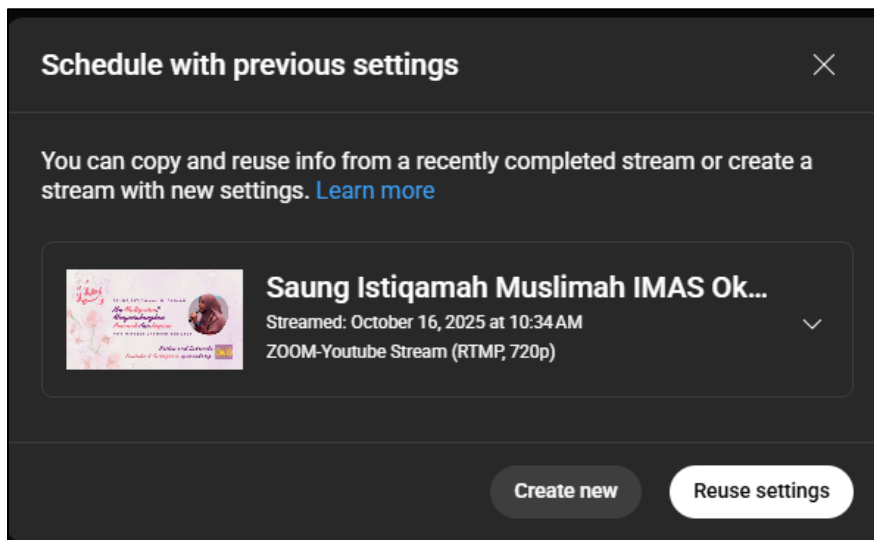

2. Click the **CREATE** button (camera with a plus symbol) in the top right and select **Go Live**.

3. In the Live Control Room, go to the **Manage** tab (to schedule for later) then click **SCHEDULE STREAM** (top right).

4. When you click **schedule** stream, Youtube will suggest following option (the last stream configuration by default):

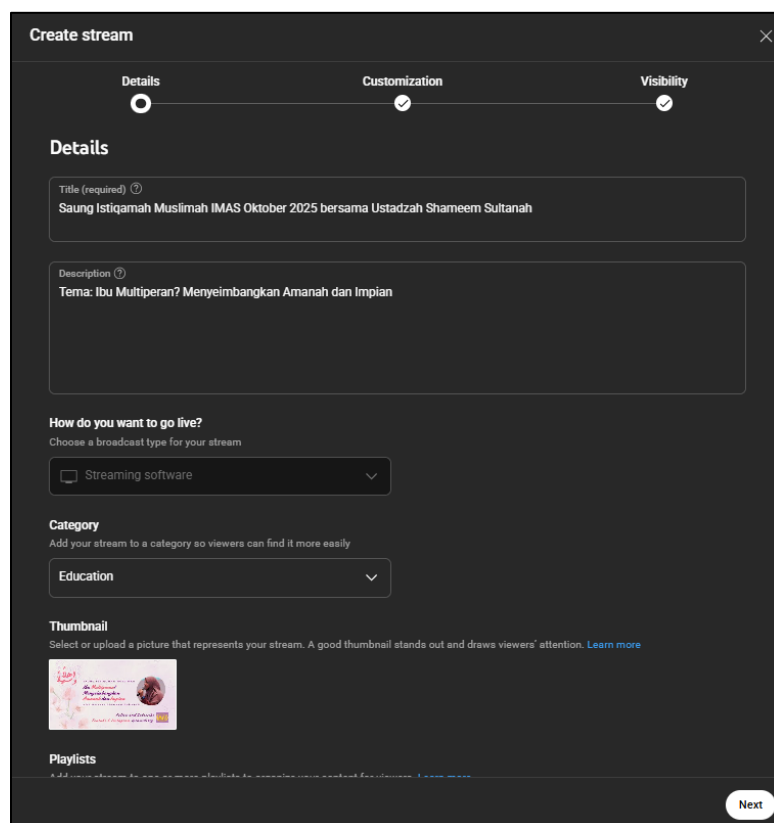

Please click **reuse settings**. **This is recommendation for any new schedule stream.**

Note: If you are an advance users/streamer, you may click create new and configure the schedule stream manually.

5. Change required details and click **Next**:

- **Title and Description.**
- **Thumbnail** (optional).

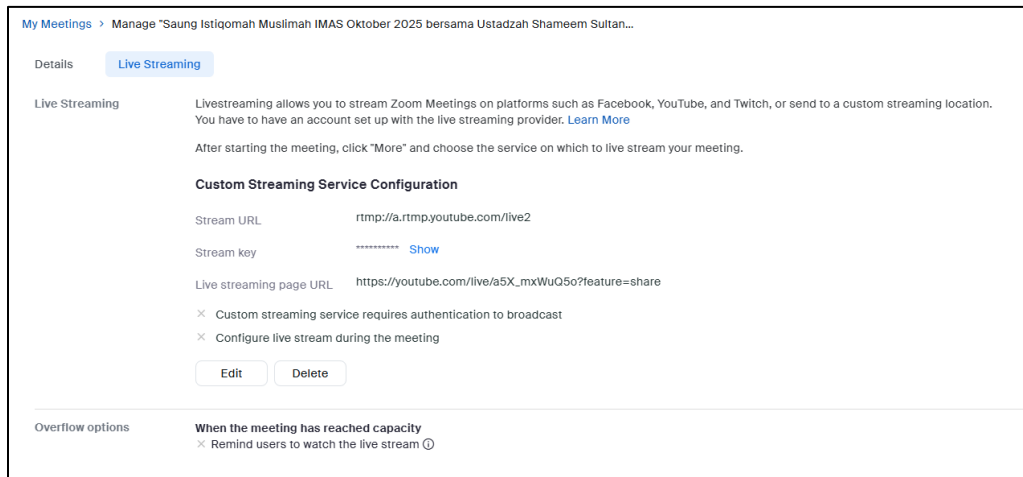

6. Review the settings under **customization** and click **Next**. **Recommendation:** use default values.
7. Set visibility option and schedule date under **visibility**.

4. Configure the Zoom Meeting

Please follow below steps to configure your zoom meeting.

Important: YouTube live settings can be configured through zoom web portal only!

1. **Schedule your Zoom Meeting** (or Webinar) via the Zoom web portal¹ and **save** the event.
2. Go to **upcoming meeting** page², click event's name/description (do not use edit button) and click the **Live Streaming** tab.

3. Click **Configure Custom Live Stream Settings** and paste the credentials you saved from YouTube:
 - **Stream URL:** Paste the YouTube **Stream URL** (RTMP URL).
E.g [rtmp://a.rtmp.youtube.com/live2](https://a.rtmp.youtube.com/live2) (check !)
 - **Stream Key:** Paste the YouTube **Stream Key**.
E.g [w5yb-4kf4-tyrg-wfjr-3dpv](#) (check !)
 - **Live streaming page URL:** Paste the YouTube **Video Link**.
Always new link for every video
4. Click **Save**.

5. Go Live During Your Zoom Meeting

1. Start your Zoom Meeting as the host at the scheduled time or slightly before (**recommendation:** 15 minutes before actual event).
2. In the meeting control bar, click the **More** button (the three dots).
3. Select **Live on Custom Live Streaming Service**. A new browser window will open, showing the progress as Zoom prepares the broadcast.

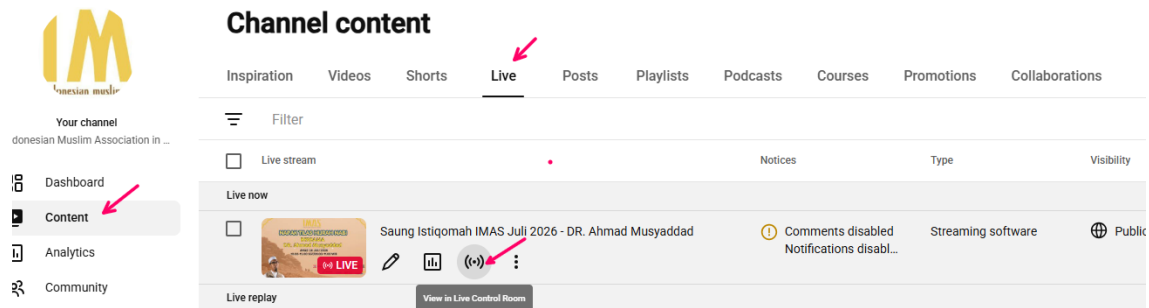

Important: If **YouTube** live is not start automatically, go to your YouTube Live Control Room for the scheduled stream. Wait for the stream preview to appear. Once you confirm the video and audio are coming through, click the **GO LIVE** button in the top right of the YouTube Live Control Room. Your Zoom meeting is now broadcasting live on YouTube!

¹ Zoom meeting can be created using desktop app.

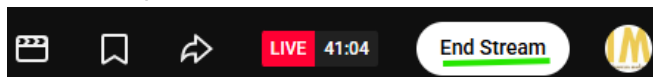

² Please do this step using zoom webportal.

6. End the Stream

1. Go back to studio.youtube.com, choose the live youtube stream ongoing currently.
2. As a youtube operator, watch the ongoing live streaming. Go to channel **Content**, choose **Live** on menu, then click the **View in live control** icon.

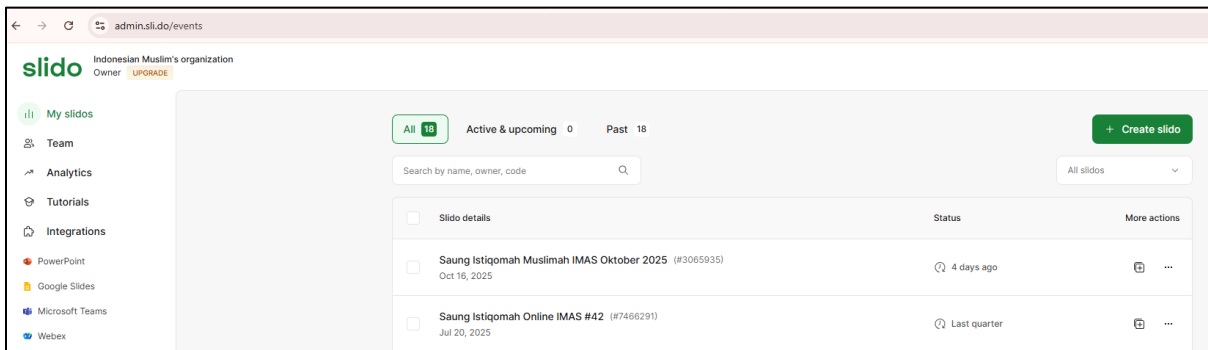

3. Watch the ongoing time and other statistics.
4. To end the public broadcast, click **END STREAM** in the YouTube Live Control Room.

5. To stop the streaming feed from Zoom (but keep the meeting open), click the **LIVE** indicator in the top-left of the Zoom meeting window, then select **Stop Live Stream**.
6. To end the Zoom Meeting for all participants, go to Zoom and click **End → End Meeting for All**.

How to create Q & A session

1. Go to <https://www.slido.com/>
2. Click Log In with Google and select imasdotsg@gmail.com

3. Click **Create slido**
4. Enter **Start Date**, **End Date** and **Slido Name (Event Name)**

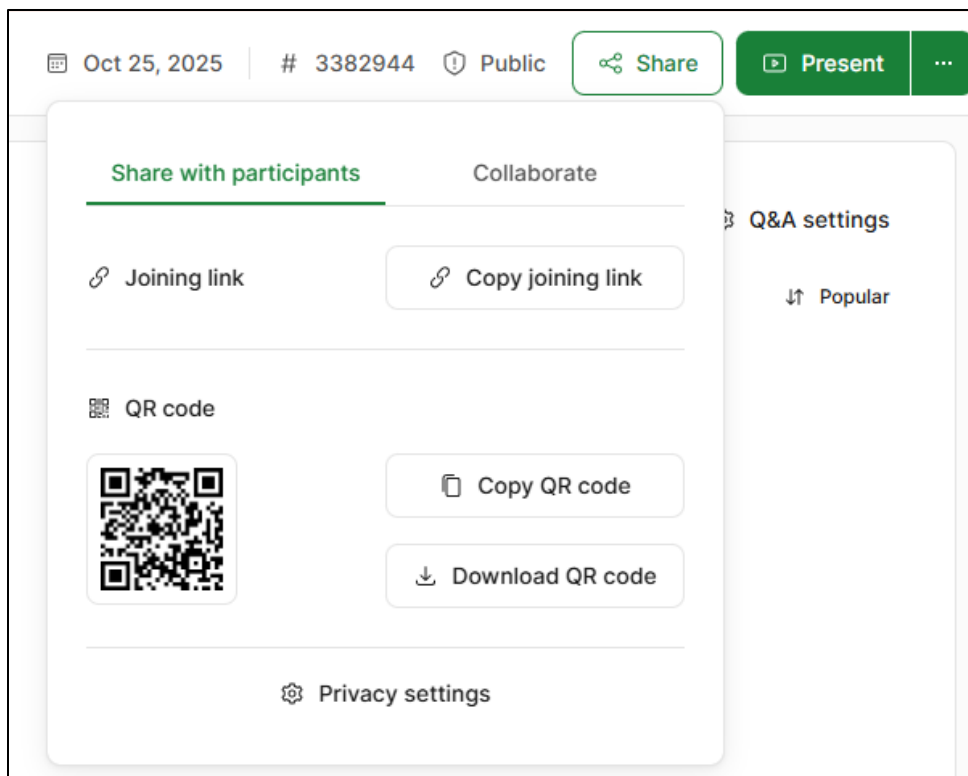

A screenshot of the 'When do you want to use this slido?' form. The form has two input fields for 'Start date' and 'End date', both with calendar icons. Below these is a text input field for 'Give your slido a name'. At the bottom, there is a blue button with an information icon and the text 'Anyone with the code or link can participate', a 'Cancel' button, and a green 'Create slido' button.

5. Click **Create Slido**
6. Select **interaction item** → **audience Q & A**

Important: please ensure the status is open!

7. Click share and copy following information: **copy joining link** and **copy QR Code** (or **download QR code**).

8. When the event **is finish**, login to slido and **Close Q&A**.

How to create short links (s.imas.sg)

Following configuration steps will be performed by IMAS Admin **only**.

1. Login to github (<https://github.com/>) and select repository: imas-sg/s.imas.sg (<https://github.com/imas-sg/s.imas.sg>)
2. Collect following information from event's committee:
 - a. Zoom Meeting URL
 - b. YouTube Live URL
 - c. Slido Q&A URL
3. Open **_redirects** file (https://github.com/imas-sg/s.imas.sg/blob/main/_redirects)

4. Click edit button (pencil icon)

5. Enter new lines for zoom meeting, YouTube live and Slido Q&A. Copy from existing, change the title (/tanya-XX, etc.) and replace the URL with the new information (step 2).
6. Click **commit changes...**
7. **IMAS Admin** provides the short links to event's committee.
